The Triplett school board employed teachers last week. Miss Eula Hardin was employed to teach the first room. The principal is Theo. A. Hollmann of Warrenton Mo.

The Brunswick school board has re-employed Prof. Livesay as the head of the school. They also have given Prof. Baker his second year of work there as he has proved efficient.

Keytesville is a pretty good place to trade. Centrally located, the county seat, it pays buyers to come here. If our merchants haven't everything you want they will get it for you.

6 pounds good Coffee \$1.00

B. F. Brewer, Jr.

The Agriculture Extension Service College of Agriculture, Columbia, Mo. Says that the service will furnish free of cost plans for a concrete silo to any person who will apply therefor.

Last Friday night scores went to the platform at Moberly and gave their hands to Evangelist Forsythe in pledging themselves to dance no more. The pledges came as a result of a sermon on dancing and card-playing.

The largest fish reported so far was 27 lb. cat brought to Triplett last week by the Sharp boys. Wash Schupback got a good one Saturday here, only Wash didn't catch it. He got it by the dollar diplomacy method. It was a carp and weighed 16 lbs.

Missouri has 10,000 lodges of fraternal orders. The Odd Fellows lead with a membership of 93,000 and the Masons next with 60,000. The figures show a membership in some organization of every married man and women in the state over 25 years of age.

Garden seed, paper and package. R. J. Halley. 10

Gardens that were not washed out by the heavy rain a week or more ago have received frequent stimulus from the showers followed by the rays of hot sun. There ought to be plenty of the whole some vegetables as the result of this kind of weather.

There are plenty of chinch bugs. In some places they are active but the heavy rains have put a quietness on many of them. The damage has been slight but much is anticipated by persons whose farms are afflicted by these pests unless some

END STOMACH TROUBLE, GASES OR DYSPEPSIA

"Pape's Diaprepain" makes Sick, Sour, Gassy Stomachs surely feel fine in five minutes.

If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of distension, heartburn, fullness, nausea, bad taste in mouth and stomach-headache, you can get blessed relief in five minutes. Put an end to stomach trouble forever by getting a large fifty-cent case of Pape's Diaprepain from any drug store. You realize in five minutes how needless it is to suffer from indigestion, dyspepsia or any stomach disorder. It's the quickest, surest stomach doctor in the world. It's wonderful.

thing unusual develops and unless the heavy rain and hail of last week put an end to them.

The timecard of the Wabash changed on Sunday May 2 and train 53 which has been leaving here west at 4:18 comes now at 4:41 p. m. 23 minutes later. This is the only change made in the card affecting this station although others are made that affect the other branch out of Brunswick.

The general impression seems to be throughout the business world that times are improving in a business sense and that the outlook for business generally is better. The steel mills are busy in part on foreign orders and for shrapnel likewise are said to be booming. The rank and file could stand a little more prosperity than ever and if business would boom a little more and guns a little less, all would be more than satisfied.

MAKES RHEUMATISM PROMPTLY DISAPPEAR

Chronic, Crippled-up Sufferers Find Relief After Few Doses of New Remedy are Taken

It is needless to suffer any longer with rheumatism, and be all crippled up, and bent out of shape with its heart-wrenching pains, when you can surely avoid it.

Rheumatism comes from weak, inactive kidneys, that fail to filter from the blood, the poisonous waste matter and uric acid; and it is useless to rub on liniments or take ordinary remedies to relieve the pain. This only prolongs the misery and can't possibly cure you.

The only way to cure rheumatism is to remove the cause. The new discovery, Croxone, does this because it neutralizes and dissolves all the poisonous substances and uric acid that lodge in the joints and muscles, to scratch and irritate and cause rheumatism, and cleans out and strengthens the stopped-up, inactive kidneys, so they can filter all the poisons from the blood and drive it on and out of the system.

Croxone is the most wonderful medicine ever made for curing chronic rheumatism, kidney troubles, and bladder disorders. You will find it different from all other remedies. There is nothing else on earth like it. It matters not how old you are, or how long you have suffered, it is practically impossible to take it into the human system without results. You will find relief from the first few doses, and you will be surprised how quickly all your misery and suffering will end.

An original package of Croxone costs but a trifle at any first-class drug store. All druggists are authorized to sell it on a positive money-back guarantee. Three doses a day for a few days is often all that is ever needed to cure the worst backache or overcome urinary disorders.

Harrow Corn For Weeds

The College of Agriculture has recently received a number of inquiries from Missouri farmers similar to the following:

"I expect to harrow my corn this spring. When should the first harrowing be done and how long can I continue it?"

In answering this question, C. B. Hutchinson of the Department of Farm Crops says: "The value of the harrow in cultivating corn depends largely upon the season and to some degree upon the soil. In a normal season the cultivation of corn should begin by harrowing lightly before the corn comes up or at least once or twice before the corn is large enough to cultivate with a cultivator. This is an especially good practice if planting has been followed by a rain that has packed the soil and caused a crust to form on top thru which the plants have difficulty in breaking. This early harrowing will also conserve moisture by stirring the top layer of soil and forming a mulch which is important in a dry season.

"On wet land and in wet seasons the weeds and grass are apt to be too far advanced for a harrow to do much good by the time one can get on the field. Under these conditions a deeper running implement that will stir the soil more should be used."

"Weeds are more easily killed as they are just coming thru the soil. Harrowing at this time is much more efficient in destroying weeds than deeper cultivations later in the season. The most important function of corn cultivation is the control of weeds and the field should be cleaned out just as early as possible."

"An ordinary spike tooth harrow with the teeth slanting slightly backwards, or a weeder, are best adapted for this purpose. If conditions will permit, it is well to harrow once before the corn is up and again before it is large enough to cultivate in the ordinary way. Where the weeds are not too numerous and persistent a weeder may be successfully used until the plants are six or eight inches high."

Care of Chicks Ten Days Old
New hatched chicks require special food and care especially during the first ten days.

After they are ten days old the following mixture should be kept in a trough where the chicks can run to it at all times:

30 parts corn meal, 30 parts wheat middlings, 10 parts pure beef scrap sifted fine and 1 part bone meal and finely cut green food.

As the chicks increase in size the mixed chick food can be replaced by coarser grains. At this stage it may be advisable to feed a wet mash once a day, about 4:00 P. M. The chicks should be given no more feed than they will eat before going to roost. As they increase in size they should have access to dry mash in a hopper where they can help themselves.

Some essentials for successful brooding are, clean food consisting of both cracked grains and ground feed; animal food, such as milk, buttermilk or commercial beef scraps; extra bone making material, such as bone meal; clear water; plenty of shade; comfortable dry quarters; freedom from lice; and access to clean fresh earth.

Eggs. Eggs.

From pure bred, prize winning Barred Plymouth Rocks, now at \$1.00 for setting. Poland China Hogs, either sex, for sale.
